Using This Summary Card

To locate the information you need, use the table of contents on the front panel. For more detailed information, refer to Book 3, *Using the Control Program*.

Special Notation

The following notation is used in some of the sections on this card.

Means a blank. Press the spacebar once.

CAPITALS

Words shown in capital letters are keywords and must be typed exactly as shown.

Italics

Italics indicate the **type** of information, rather than the exact information. What you actually type in replaces the italic entry.

Brackets indicate optional information. If you want to include optional information you must type only the information, **inside** the brackets — not the brackets themselves.

Commas and Parentheses

These must be entered as shown. If they are inside brackets, they are optional and are used only if you decide to specify the bracketed information.

Using the Keyboard

For keys with several functions:

To get the uppercase function, press shift with the key you want.

To get the lowercase function, press the key by itself.

To get the alternate case function, press Alt with the key you want.

Displaying Help

1. Press WS Ctrl to get into WS Ctrl mode.
2. Press Help.
3. Press Alt with the black up or down cursor movement keys to page through Help.
4. When done, press Help and then WS Ctrl.

Topic*

On this summary card, when you see an asterisk next to a topic, it means that the function (Autokey is an example) is optional; you only have the function if it was specified when your control program was customized.

Using Windows

To save your windows, use “Saving and Restoring Screen Profiles” on page 16.

Selecting a Window

- Press the Jump key or
- Press WS Ctrl and then press the short name of the selected window (A-Z).

Sizing a Window

The personal computer window must be active and contain the DOS prompt.

Saving and Restoring Everything

- **To save your notepads, screen profiles, and autokey recordings recordings:**
 1. Type: `indsave`
 2. Press Enter.
- **To restore your notepads, screen profiles, and autokey recordings:**
 1. Type: `indrstr`
 2. Press Enter.

Saving and Restoring Notepads

- **To save your notepads:**
 1. Type: `indsave notepad`
 2. Press Enter.
- **To restore your notepads:**
 1. Type: `indrstr notepad`
 2. Press Enter.

Saving and Restoring

Saving and Restoring Screen Profiles

- **Saving screen profiles:**
 1. Type: `indsave screen`
 2. Press Enter.
- **Restoring screen profiles:**
 1. Type: `indrstr screen`
 2. Press Enter.

Saving and Restoring Autokey Recordings

- **To save your autokey recordings:**
 1. Type: `indsave autokey`
 2. Press Enter.
- **To restore your autokey recordings:**
 1. Type: `indrstr autokey`
 2. Press Enter.

Copying Data*

This function allows you to copy data from one place to another within a window or into a different window.

First, Define the Source

1. Press WS Ctrl to get into WS Ctrl mode.
2. Press the short name (A-Z) of the window you want to copy from.
3. Press PF13 (Source).
4. Use the black cursor movement keys to move the cursor under the first character position of the data you want to copy. *Make sure you allow for the longest line.*
5. Press Alt with CrSel.
6. Use the black cursor movement keys to move the cursor under the last character position of the data you want to copy. *Make sure you allow for the longest line.*
7. Press Alt with CrSel.

If the source is not what you want it to be, follow steps 3 through 5 again to remark the source.

8. Now, define where you want the copy to go (the target).

Copying Data*

Second, Define the Target

1. If you are copying data inside the same window, skip to step 3 below.
2. If you are copying data to a different window, press the short name of the target window (A-Z) that you want to copy to.
3. Press PF14 (Target).
4. Use the black cursor movement keys to move the cursor to the top left corner of where you want the copy to go.
5. Press Alt with Cr Sel to mark the target.

If the target is not where you want it to be, follow steps 3 through 5 again to remark the target.

6. Press Enter to complete the copy.
7. When done, press WS Ctrl.

Printing

Printing on the Work Station-Attached Printer*

To print what is on the screen:
